<ul style="list-style-type: none">• Food Site Approval• High Density foam• Cleaner Sanitiser• Removes blood, Soap scum, mould, fats and protein• Cooking oils	<ul style="list-style-type: none">• Showers/ Ablutions• Kitchens• Abattoirs (floors/ walls/ benches)• Small Goods Manufacturers• Seafood Process

Description

Floor Cleaner HD Chlorinated is a blend of surfactants, alkalis and chlorine which provides a 3 way cleaning process. The product is fast acting and penetrates many soils found in Food processing areas, Showers and Ablution blocks. **Floor Cleaner HD Chlorinated** contains a suspension agent to prevent re-deposition, and combined with an active chlorine agent will sanitise the surface. Most effective on all hard surfaces.

Directions for Use

Light Soilage: Use 10ml **Floor Cleaner HD Chlorinated** per 1lt water.

Heavy Soilage: Use 20ml **Floor Cleaner HD Chlorinated** per 1lt water.

White Cutting Boards – Use NEAT. Squirt product onto surface. Lightly scrub with brush or scouring pad (white) for best results. Create foam lather and allow a short time to react with soilage. Allow a few minutes contact time. Rinse off with water.

Abattoirs / Food - Fish Processing / Small Goods manufacturing – Mop bucket or utilising Foam System – Use 25ml of **Floor Cleaner HD Chlorinated** per litre of water.

Bathroom/Toilet – Use 20ml **Floor Cleaner HD Chlorinated** per litre of water.

Safety Information

Floor Cleaner HD Chlorinated is classified as Irritant according to GHS criteria.
