Description

BLEACH 4 is a non perfumed bleaching and sanitising agent suitable for use in food processing and preparation areas.

Directions For Use

No Rinse Sanitising and Bleaching: Add between 1 part BLEACH 4 to 800 parts water (1 tsp to 4 litres water) to 1 part BLEACH 4 to 200 parts water (4 tsp to 4 litres water). Pre-clean items with detergent and water then soak for 1-5 minutes in BLEACH solution, remove and allow to air dry.

Stronger solutions may be used, however all food contact surfaces must be rinsed with potable water after use.

Do not allow bleach solutions to contact stainless steel for more than 30 minutes.

Safety Information

Bleach 4 is a corrosive liquid containing an oxidising chlorine compound. Do not mix Bleach 4 with any other product. Ensure that no contact with any mild steel or metal as this will decompose the product and create severe corrosion with any metal except high grade stainless steel. Avoid contact with the product at all times. Ensure adequate ventilation when using. Vapour may be harmful.

If poisoning occurs contact a doctor or Poisons Information Centre, Australia on 13 11 26. If in eyes, hold open and flood with plenty of clean water for at least 15 minutes and seek medical attention. If swallowed rinse mouth with water - do not induce vomiting, give water to drink and seek medical attention. If skin or hair contact occurs, flush area thoroughly with clean water, seek medical attention if required.

DO NOT MIX WITH ANY OTHER CHEMICAL

Packaging - 5lt
