### **Description**

Enzyme Floor & Drain Cleaner is used to remove grease, fats and oils from all hard surfaces. It must be used in cold water and left to dry. Enzyme Floor & Drain Cleaner can be used in drains and grease traps to reduce solids content hence reducing the chance of blocked drains and greatly reducing mal odours.

### **Directions For Use**

Floor Mopping: Dilute 1 part to 50 parts cold water. Temperature must not exceed 35<sup>0</sup>c. Mop floor and scrub where necessary. Leave floor to dry. As the floor dries, the enzymes and bacteria will continue to attack and consume grease and oils making the surface less slippery with time.

Drain Management: Prepare enzyme solution and pour into drain prior to down time. Allow several hours contact time in drain. For dirty conditions dilute 1 part to 4 parts water (use 100ml of mixture per drain). For clean conditions, dilute 1 part to 9 parts water (use 100ml of mixture per drain).

### **Safety Information**

Although Enzyme Floor & Drain Cleaner is classified non hazardous, contact with the skin and eyes should be avoided. Do not eat or drink when using.

If poisoning occurs contact a doctor or Poisons Information Centre, Australia on 13 11 26. If in eyes, hold open and flood with water for a minimum of 15minutes, and seek medical attention if irritation persists.

If swallowed, do not induce vomiting, give water to drink and seek medical attention. If skin or hair contact occurs flush area thoroughly with clean water.

**Packaging:** 5lt

**PFD ORDER CODE:**
