Description

Floor Cleaner HD Chlorinated is a blend of surfactants, alkalis and chlorine which provides a 3 way cleaning process. The product is fast acting and penetrates many soils found in Ablution blocks, Showers and Food processing areas. Floor Cleaner HD Chlorinated contains a suspension agent to prevent re-deposition, and combined with an active chlorine agent will sanitise the surface. Most effective on all hard surfaces.

Directions For Use

Light Soilage: Showers/Ablution Blocks - Light Soilage – place a dilution of 20ml Floor Cleaner HD Chlorinated to 1lt of water in a labelled squeeze bottle and squeeze over area required to clean. Lightly scrub with brush or scouring pad (white) for best results. Create foam lather and allow a short time to react with soilage. Rinse off with water.

Heavy Soilage – use neat. Squirt product onto surface. Lightly scrub with brush or scouring pad (white) for best results. Create foam lather and allow a short time to react with soilage. Allow a few minutes contact time. Rinse off with water.

Abattoirs / Food - Fish Processing / Small Goods manufacturing – Mop bucket or utilising Foamer System – Use 25ml of Floor Cleaner HD Chlorinated per litre of water.

Safety Information

Floor Cleaner HD Chlorinated is classified as an irritant substance. Avoid contact with the product at all times. Ensure when using this product the user wears the personal protective equipment stated on the material safety data sheet.

If poisoning occurs contact a doctor or Poisons Information Centre, Australia on 13 11 26. If in eyes, hold open and flood with water for a minimum of 15minutes, and seek medical advice urgently. If swallowed, do not induce vomiting. Give water to drink and seek medical advice urgently. If skin contact occurs, remove all contaminated clothing and wash skin thoroughly, seek medical attention if required.
